

IMD Faculty Validation Worksheet

Faculty working draft - September 2026

Fill in only the courses you have taught. Save the PDF and return it to the Specializations Committee. Use the bookmarks to jump to a course. Leave every other course blank.

The I-P-A-D scale

Rate the level every student must reach to finish the offering. Do not rate the strongest project.

I Introduced	Every student encounters the concept, tool, vocabulary, or method.
P Practiced	Every student applies it more than once, with guidance and feedback.
A Advanced	Every student uses it with greater independence, complexity, integration, or specialization.
D Demonstrated	Every student synthesizes it in a substantial public or professional presentation.

Not taught means you do not require it. Varies means your own offerings do not share one level. If the published map says a level holds only when the project requires it, rate the level you hold every student to and write Project-dependent in the match field.

What to report

Describe the offerings named at the top of the sheet: what every student was required to do in order to finish. Report requirements, not hopes. The catalog description, a plan for next time, the strongest project, and an optional tool or topic are not answers.

If two instructors teach the same course, each completes a separate copy for their own offerings. One sheet may cover more than one semester only when the requirements were the same. If a later offering changed a required assignment, a rating, or a facility every student uses, write Varies and state what changed.

Words that count as a finished answer

None - This course does not do the thing asked.

I do not know - You would be describing someone else's course, or a path you did not teach.

Varies - Your own offerings differ. State the difference.

Project-dependent - Only some students do this, because the project determines it.

A blank line is unfinished. None is finished.

How to answer

1-2. Choose the I-P-A-D level defined above. Evidence names the required assignment. Not taught takes evidence None.

3. List skills you rely on in the first weeks. A prerequisite counts only when that preparation is actually present. If you rely on nothing beyond enrollment, write None.

4. List what every student must be able to do, or must turn in, to finish. Leave out work that only some projects produce.

5. Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

6. Check one box for continuing earlier work, then write the sentence you say to a student who asks. If you check Not applicable, write None.

7. On every facility row, choose Guaranteed, Available, or Not used. Guaranteed means every student who finishes has used it. Available means some finish without using it. Guided means staff or instruction runs it. Independent means students operate it as required work. Add a row for any tool that is guaranteed.

8. Portfolio-ready means a record the student could show outside this course without you explaining it. Check one box. Name the assignment, or write None.

9. Check None, or name each role, practice, or career context this offering introduces, and label it Graded requirement, Taught topic, or Project-dependent. Examples are printed under the question.

10. A break is a place where students entering this course are out of step with a required earlier course. Repetition: you grade again a skill an earlier course already graded, with no new demand. Missing preparation: you have to teach a skill you counted on an earlier course to provide. Abrupt jump: you require a skill or scale of work no required earlier course prepared. Name the skill, choose the kind, and name where it shows up. If you did not hit one, write None observed.

Last line. The gray paragraph under the course title is the committee's reading of published materials: the job of the course, who it is for, and the competency levels it names. Write Matches if that paragraph is an accurate account of what every student had to do. If it is not, write one sentence naming the part that is wrong and what the offering actually required. Do not repeat answers from above, and do not propose a replacement paragraph.

Partner-course tables and the program synthesis are not in this file. Those pages are for the committee, unless you were separately assigned the partner-course sheet in the markdown worksheet.

IMDM101 - Introduction to Immersive Media

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Typical cohort

first-year / mixed / other

Published-map claim, for the last line only: Shared introductory studio. Provisional stage I. Primary competencies: interaction, physical computing, collaboration, production, research and context. Matrix placements: Interaction Design I; Physical Computing I; Collaboration I; Production and Project Management I; Research and Critical Practice I.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Interaction Design		
Published map: I		
Physical Computing		
Published map: I		
Collaboration		
Published map: I		
Production and Project Management		
Published map: I		
Research and Critical Practice		
Published map: I		
Published map: not listed		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

-
-

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.	
2.	
3.	

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.
- ☐ Permitted - You allow it if asked, and you do not ask for it.
- ☐ Discouraged - You require work that starts in this course.
- ☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

--

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

Large projection wall			
Prototyping makerspace			
Motion capture			
Imaging and 3D scanning			
Sound facilities			
Design studio or lab			
XR / VR lab			

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one box.

- ☐ Required
- ☐ Optional or partial
- ☐ Not produced

Name the assignment. If you checked Not produced, write None.

--

9. Professional roles, practices, or career contexts

☐ None in this course

Or name each one and label it Graded requirement (finishing depends on it), Taught topic (you teach it, and it is not separately graded), or Project-dependent (it arises only for some projects).

Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.

Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.

Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.

Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Skill	Kind of break	Earlier course, and the assignment here

Last line

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question.

This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do.

If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced.

Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

IMDM127 - Creative Coding for Digital Media

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Who takes it

Emerging Creatives / Computing students without CMSC131 / other

Published-map claim, for the last line only: Creative-coding foundation for the B.A. path, with CMSC122. Matrix placements: Programming and Creative Coding I; Interaction Design I. Restriction: students must not have completed CMSC131-499.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Programming and Creative Coding		
Published map: I		
Interaction Design		
Published map: I		
Audio and Sound		
Published map: Not listed		
Published map: not listed		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

-

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1.	
2.	

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.	
2.	
3.	

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

IMDM350

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.
- ☐ Permitted - You allow it if asked, and you do not ask for it.
- ☐ Discouraged - You require work that starts in this course.
- ☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

XR / VR experience

Immersive projection

Installation or gallery visit

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one box.

- ☐ Required
- ☐ Optional or partial
- ☐ Not produced

Name the assignment. If you checked Not produced, write None.

9. Professional roles, practices, or career contexts

☐ None in this course

Or name each one and label it Graded requirement (finishing depends on it), Taught topic (you teach it, and it is not separately graded), or Project-dependent (it arises only for some projects).

Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.

Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.

Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.

Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Skill	Kind of break	Earlier course, and the assignment here

Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

IMDM227 - Introduction to Computational Media

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Mix of preparation in a typical section

mostly CMSC131 / mostly IMDM127 + CMSC122 / mixed

Published-map claim, for the last line only: Programming for visual, auditory, and tactile art. Provisional stage P. Prerequisites: IMDM101, and either CMSC131 or both IMDM127 and CMSC122. Matrix placements: Programming and Creative Coding P; Interaction Design P; Audio and Sound I; Physical Computing P. The third-semester portfolio review typically occurs while students are in this course. Primary competencies also include computational media and interface design.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Programming and Creative Coding		
Published map: P		
Interaction Design		
Published map: P		
Audio and Sound		
Published map: I		
Physical Computing		
Published map: P		
Computational media		
Published map: Named in the course-role table; no separate matrix level		
Interface design		
Published map: Named in the course-role table; no separate matrix level		
Portfolio Development		
Published map: I, via the third-semester review, not necessarily via this course		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

-
-
-

Name one required skill the two prerequisite paths do not share, from students you taught. If you taught only one path, write I do not know.

IMDM227 (continued)

Preparation that is consistently missing. Write None if nothing is missing.

--

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.	
2.	
3.	

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

IMDM290 requires this course and ARTT255.

IMDM290	
IMDM327	

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.
- ☐ Permitted - You allow it if asked, and you do not ask for it.
- ☐ Discouraged - You require work that starts in this course.
- ☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

--

Published map: Named in the course-role table; no separate matrix level		
Asset management		
Published map: Named in the course-role table; no separate matrix level		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1. From IMDM227	
2. From ARTT255	
3.	

For each skill above, write Both tracks, or name the track that does not arrive with it. If you have not taught both tracks, write I do not know.

IMDM290 (continued)

Preparation that is consistently missing. Write None if nothing is missing.

--

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.	
2.	
3.	

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

IMDM390	
IMDM490	

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.
- ☐ Permitted - You allow it if asked, and you do not ask for it.
- ☐ Discouraged - You require work that starts in this course.
- ☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

--

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

Large projection wall			
Prototyping makerspace			
Motion capture			
Imaging and 3D scanning			
Sound facilities			
Design studio or lab			
XR / VR lab			
Asset-management tools every student uses			

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one box.

- ☐ Required

- ☐ Optional or partial
- ☐ Not produced

Name the assignment. If you checked Not produced, write None.
Name the individual record every student must keep from a team project. If individuals keep nothing of their own, write None.

9. Professional roles, practices, or career contexts

- ☐ None in this course

Or name each one and label it Graded requirement (finishing depends on it), Taught topic (you teach it, and it is not separately graded), or Project-dependent (it arises only for some projects).
Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.
Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.
Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.
Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Skill	Kind of break	Earlier course, and the assignment here

This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do.
If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced.
Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

IMDM327 - Computational Virtual Reality

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Published-map claim, for the last line only: Computing-track technical study of VR/AR systems, rendering, tracking, spatial content, and interaction. Provisional stage A. Prerequisites: IMDM227 and CMSC132. Matrix placements: Programming and Creative Coding A; Interaction Design A; 3D and Spatial Media P and A; Specialized Facilities A. Primary competencies also include tracking and spatial interaction and audio. Not required on the Emerging Creatives path.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Programming and Creative Coding		
Published map: A		
Interaction Design		
Published map: A		
3D and Spatial Media		
Published map: P and A		
Audio and Sound, including spatial audio		
Published map: Named in the course-role table; advanced audio is listed as special-topics or project-dependent		
XR systems, rendering, and tracking		
Published map: Named in the course-role table; no separate matrix level		
Specialized facilities and equipment		
Published map: A		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1. From IMDM227	
2. From CMSC132	
3.	

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.	
2.	
3.	

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

Name any required IMDM course whose instructor has agreed to use an assignment from this course. If none, write None in the table.

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.
- ☐ Permitted - You allow it if asked, and you do not ask for it.
- ☐ Discouraged - You require work that starts in this course.
- ☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

--

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

XR / VR lab or headsets			
Tracking hardware			
Spatial audio setup			
Large projection wall			
Engines, libraries, or platforms every s...			

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one box.

- ☐ Required
- ☐ Optional or partial
- ☐ Not produced

Name the assignment. If you checked Not produced, write None.

--

9. Professional roles, practices, or career contexts

☐ None in this course

Or name each one and label it Graded requirement (finishing depends on it), Taught topic (you teach it, and it is not separately graded), or Project-dependent (it arises only for some projects).

Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.

Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.

Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.

Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Skill	Kind of break	Earlier course, and the assignment here

Last line

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question.

This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do.

If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced.

Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

IMDM350 - Advanced Digital Media Theory

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Published-map claim, for the last line only: Advanced theory of digital culture and creative technology for Emerging Creatives. Provisional stage A. Prerequisite: IMDM150. Matrix placements: Artificial Intelligence and Machine Learning I as critical context, not technical practice; Research and Critical Practice P. The course-role table also names game culture, AR/VR, networks, and ethics. The games and AI cases in the current-state map treat this course as critical context, not as a production pathway.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Research and Critical Practice		
Published map: P		
Artificial Intelligence and Machine Learning		
Published map: I, critical context		
Game culture and game criticism		
Published map: Named in the course description; no production rating		
AR / VR as critical or cultural study		
Published map: Named in the course-role table		
Ethics, environmental, social, or political context		
Published map: Named in the course description		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1. From IMDM150

2.

Preparation that is consistently missing. Write None if nothing is missing.

IMDM390 - Collaborative Studio II: Experiential Computing

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Published-map claim, for the last line only: Team-based experiential work from sketches to larger projects, including research, production, critique, display, and documentation. Provisional stage A. Prerequisite: IMDM290. IMDM490 does not require this course. Matrix placements: Interaction Design A; Visual Design D when visually central; Physical Computing A; Portfolio Development A through documentation; Collaboration A; Production and Project Management A; Research and Critical Practice P; Specialized Facilities A. Primary competencies also include experiential design.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Interaction Design		
Published map: A		
Collaboration		
Published map: A		
Production and Project Management		
Published map: A		
Research and Critical Practice		
Published map: P		
Experiential design		
Published map: Named in the course-role table; no separate matrix level		
Physical Computing		
Published map: A, and also described as project-dependent		
Visual Design		
Published map: D when visually central		
Portfolio Development / documentation		
Published map: A		
Specialized facilities and equipment		
Published map: A		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1. From IMDM290
2.
3.

Where do Computing and Emerging Creatives students arrive differently?

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.
2.
3.

5. Later courses that use a required assignment

Name a later course only if you have agreed with its instructor that a required assignment will be used there. If you have not agreed, write None.

IMDM490	

6. Continuing earlier work

Check one box.

- ☐ Encouraged - You ask for earlier work and grade the new learning.

IMDM490 - Senior Capstone I

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Share of the class that also took IMDM390

Published-map claim, for the last line only: Research, design, prototyping, organization, and production planning for a substantial project. Provisional stage A-D. Prerequisite: IMDM290 and at least 86 credits. IMDM390 is not required. Matrix placements: Production and Project Management A; Research and Critical Practice A; Professional Practice A. Several D ratings attach to Capstone when the project makes them central. Primary competencies also include integration and project development.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Production and Project Management		
Published map: A		
Research and Critical Practice		
Published map: A		
Professional Practice		
Published map: A		
Integration / project development		
Published map: Named in the course-role table; stage A-D		
Prototyping		
Published map: Named in the course-role table		
Programming and Creative Coding		
Published map: D when technically central		
Interaction Design		
Published map: D when interaction is central		
Collaboration		
Published map: D depending on project structure		
Published map: not listed		

3. Incoming expectations

One skill per line: something you rely on in the first weeks. If a listed prerequisite is not actually usable, put that under missing preparation. Write None where nothing applies.

1. From IMDM290

IMDM490 (continued)

2. From IMDM390, if they took it

3. From the track core (Computing or Emerging Creatives)

Among students you taught who had not taken IMDM390, name the skill you had to teach because they lacked it. If you did not teach such students, write I do not know.

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

These are required to finish IMDM490 and to start IMDM491. Omit work that only some projects produce.

1.

2.

3.

5. What every student must hand to IMDM491

Name a handoff only if you have agreed on it. Write what is handed off, and whether it is Agreed or Not agreed.

6. Continuing earlier work

Check one box.

☐ Encouraged - You ask for earlier work and grade the new learning.

☐ Permitted - You allow it if asked, and you do not ask for it.

☐ Discouraged - You require work that starts in this course.

☐ Not applicable - Students have no earlier IMD work.

Write the sentence you say to a student who asks to continue an earlier project. If you checked Not applicable, write None.

Of the projects in these offerings, how many continued earlier coursework, and how many began in IMDM490? Give the two counts. If you cannot separate them, write I do not know.

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

Large projection wall

Prototyping makerspace

Motion capture

Imaging and 3D scanning

Sound facilities

Design studio or lab

XR / VR lab

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one. Required in IMDM490 means every student produces the record in this course. Deferred to IMDM491 means this course does not require it. Optional means only some students produce it.

☐ Required in IMDM490

☐ Deferred to IMDM491

☐ Optional

Assignment name, or None.

9. Professional roles, practices, or career contexts

Check a box only if it happened in these offerings. Beside each checked box, write Graded requirement, Taught topic, or Project-dependent. If you check none, write None in Other. Use Other for a role or practice that is not listed.

Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

☐ Role identification

☐ Career research

☐ Collaborative expectations

☐ Budgeting

☐ Client or external partner work

☐ Intellectual property

☐ Entrepreneurship

☐ Production planning

Other

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.

Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.

Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.

Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Last line

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question.

This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do.

If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced.

IMDM490 (continued)

Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

IMDM491 - Senior Capstone II

Leave the rest of this course blank if you did not teach these offerings.

Your name

Offerings (semester and year)

Published-map claim, for the last line only: Realization, refinement, public exhibition, and promotion. Provisional stage D. Prerequisite: IMDM490. Matrix placements: Portfolio Development D; Production and Project Management D; Professional Practice D. Other competencies are D only when the project makes them central. Primary competencies: production, refinement, exhibition, professional communication.

1-2. Competencies and evidence

Rating is the level every student must reach: I, P, A, D, Not taught, or Varies. Evidence names the required assignment. Match is Yes, or No and what differs. Not taught takes evidence None. Use a blank row only for a required competency that is not listed.

Rating	Required evidence	Match: Yes, or No and what differs
Production and Project Management		
Published map: D		
Portfolio Development		
Published map: D		
Professional Practice		
Published map: D		
Exhibition and public presentation		
Published map: Named in the course-role table; stage D		
Refinement		
Published map: Named in the course-role table		
Professional communication, promotion, public relations		
Published map: Named in the course-role table and catalog		
Research and Critical Practice		
Published map: D at public presentation		
Published map: not listed		

3. Incoming expectations

List what every student must already have from IMDM490 in order to do the first required work. If they need nothing beyond a passing grade in IMDM490, write None.

-
-
-

Preparation that is consistently missing. Write None if nothing is missing.

4. What every student must leave with

One item per line: a skill or a submission required to finish. Omit work that only some projects produce.

1.
2.
3.

5. What must outlast the course

There is no required later course. Name the public or professional record every student must still have after the course ends. If none is required, write None.

6. Continuing earlier work

Check one rule. Then check every source you actually saw. If you cannot tell where a project started, write I do not know and leave the source boxes blank.

- ☐ I ask students to continue earlier work, and I grade the new learning.
- ☐ I allow it when asked, and I do not ask for it.
- ☐ I require the second semester to follow the IMDM490 plan without bringing in other coursework.

Sources I saw

- ☐ A project begun in IMDM490
- ☐ Work from IMDM390 or IMDM290
- ☐ Work from track courses, special topics, or independent study
- ☐ A project that began in IMDM491

Name the new work every student must do in this semester beyond finishing the IMDM490 plan. If the semester is only completion of that plan, write Completion only.

7. Facilities, technologies, and equipment

Choose Guaranteed, Available, or Not used on every row. Add a tool every student must use on a blank row.

Exhibition venue or display			
Large projection wall			
Prototyping makerspace			
Motion capture			
Imaging and 3D scanning			
Sound facilities			
XR / VR lab			

8. Portfolio-ready documentation

Portfolio-ready means a record the student could show outside this course without you explaining it: the work, their role, and a viewable file, page, or statement.

Check one box.

- ☐ Required

- ☐ Optional or partial
- ☐ Not produced

Name the assignment. If you checked Not produced, write None.

Name the record every student must be able to show after exhibition, including a student whose work was collaborative. If no individual record is required, write None.

9. Professional roles, practices, or career contexts

Check a box only if it happened in these offerings. Beside each checked box, write Graded requirement, Taught topic, or Project-dependent. If you check none, write None in Other. Use Other for a role or practice that is not listed.

Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice.

☐ Exhibition planning

☐ Marketing, public relations, or promotion

☐ Public presentation

☐ Individual role credit within a team

☐ Job or graduate-study materials

☐ Intellectual property

☐ Client or partner communication

Other

10. Breaks you actually hit

A break is a place where students entering this course are out of step with a required earlier course. In the first box, name the skill. In the second, choose the kind of break. In the third, name the earlier course and the assignment in this course where you hit it. If you did not hit one, write None observed in the first box and leave the others blank. If this course has no required earlier course, write None observed.

Repetition. You grade students again on a skill a required earlier course already graded, and this course adds no new demand. Example: the first project grades the same asset-management task a prior studio already required.

Missing preparation. You have to teach a skill you counted on a required earlier course to provide, because students arrive without it. Example: you expected the prerequisite to leave students able to structure a program, and you have to teach that before they can start.

Abrupt jump. You require a skill, or a scale of work, that no required earlier course prepared. Example: the first project asks for a room-scale installation, and no required prior course had students work at that scale.

Skill	Kind of break	Earlier course, and the assignment here

Last line

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question.

This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do.

If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced.

Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

Special topics and independent work

Complete this only if you taught the topic or supervised the work. Use the same answer rules as the course sheets. Write None or I do not know where those apply. Leave it blank if you did not teach it. A second topic form follows this one.

IMDM298 / IMDM398 / IMDM498 - topic 1

Course number

Topic title

Your name

Semester and year

Who was allowed to enroll

Published-map claim, for the last line only: Variable special topics. Provisional stage I-A. The map treats games, AI, sound, physical computing, and facilities depth as sometimes living here rather than in a required sequence.

Competencies every student had to reach, with I, P, A, or D, and the assignment for each

Skills you relied on in the first weeks, or None

What every student had to turn in to finish

A later course that had agreed to use a required assignment, or None

Continuing earlier work: Encouraged, Permitted, Discouraged, or Not applicable, plus the sentence you say to a student

Facilities or tools marked Guaranteed, and those only Available

Portfolio-ready documentation: Required, Optional, or Not produced. Name the assignment or write None

Professional role or practice, or None. Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice. Label each one Graded requirement, Taught topic, or Project-dependent.

A required-sequence skill this topic demands that no required course provided, or None

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question. This line is where you say whether that claim is true of the offerings you taught. Portfolio-ready documentation: Required, Optional, or Not produced. Name the assignment or write None

Professional role or practice, or None. Examples, and only if this offering introduces them: a production role such as designer, artist, programmer, technical director, or producer; collaborative expectations; an asset or production pipeline; client or partner work; budgeting; intellectual property; entrepreneurship; exhibition; promotion or public presentation; portfolio, job, or graduate-study materials; career research; criticism, curation, or research practice. Label each one Graded requirement, Taught topic, or Project-dependent.

A required-sequence skill this topic demands that no required course provided, or None

The published-map claim on this sheet is the committee's reading of published materials. On a course sheet it is the gray paragraph under the title. It states the job of the course, who it is for, and the competency levels it names. It is not a question. This line is where you say whether that claim is true of the offerings you taught. Write Matches if a colleague could treat the paragraph as an accurate account of what every student had to do. If it is not accurate, write one sentence. Name the part of the paragraph that is wrong, and name what the offering actually required. Example: The paragraph says Interaction Design is only Introduced; every student is graded on two interactive studies, which is Practiced. Do not repeat answers you already wrote above. Do not propose a replacement paragraph.

Special topics (continued)

IMDM399 / IMDM499

Complete this for the pattern you actually supervised. Do not describe independent work you did not supervise.

Course number

Your name

Semesters

What every student had to produce

The competency level every student had to reach (I, P, A, or D)

A required IMDM course that was supposed to provide this work and did not. Name it, or write None

How many of these projects continued into a course you also taught. Give the count, or I do not know
