

IMD Student Experience Worksheet

Specializations Committee - September 2026

Purpose. This survey asks how you experience the IMD major: where you want to go further, where a course needed something you did not yet have, how the curriculum feels, and whether later courses use earlier work. Exploring, and caring about more than one area, are useful answers.

Use. The IMD Specializations Committee will read the responses together and look for patterns. It will use those patterns, along with reports from faculty about the courses they teach, in its discussion of specializations and of how courses connect. Your answers are not a grade. They do not change your schedule or your degree requirements.

Privacy. Your name is optional. If you leave it blank, the committee will not try to identify you. If you write your name, the committee can connect this sheet to you. Only committee members will read individual sheets. In any report to faculty, the committee will share patterns and will not include your name. A project or other detail you choose to describe can still make a response recognizable. Do not name other students.

Where a question says check all, mark every box that fits. Where it says choose one, mark a single answer.

1. About you

Name (optional)

Track. Choose one. If you choose Other major, write the major in the blank.

☐ Computing B.S. ☐ Emerging Creatives B.A. ☐ Not sure yet ☐ Other major

Year

☐ First ☐ Second ☐ Third ☐ Fourth ☐ Beyond the fourth

2. Where you want to go further

Going further means a later course can use what you already know, and still teach you something new. Check all that apply.

☐ Games

☐ Extended reality (VR / AR)

☐ Artificial intelligence

☐ Interaction

☐ Physical computing

☐ 3D and technical art

☐ Sound

☐ Image, animation, and video

☐ Research and criticism

☐ Still looking

☐ I want to stay broad

☐ Other

The area you would put first. Write the name, or Still looking.

Can you see IMD courses that would let you keep developing that area, from a first try through later work? Choose one. Partly means you can name some courses, but not a path from one course to the next.

☐ Yes ☐ Partly ☐ No ☐ I do not know

What would make it easier to keep developing that area? Write one or two sentences. If you are still looking, write what would help you find a direction. If nothing comes to mind, write None.

3. Where preparation was missing

Check all that apply. These are areas where a course needed something you did not yet have.

☐ Coding

☐ Visual design

☐ Interaction

☐ 3D or spatial work

☐ Sound

☐ Hardware or physical computing

☐ Research or criticism

☐ Teamwork or production

☐ Showing or documenting work

☐ Labs or equipment

☐ None of these

The clearest example. Write what was missing and which course needed it. If you checked None of these, write None.

4. How the major feels

Choose one number for each statement. 1 Strongly disagree. 2 Disagree. 3 Neutral. 4 Agree. 5 Strongly agree.

	1	2	3	4	5
I can find courses that match what I want to learn.	☐	☐	☐	☐	☐
The required courses feel connected to each other.	☐	☐	☐	☐	☐
There is room to try things I did not plan to try.	☐	☐	☐	☐	☐
Once I care about an area, I can get better at it in this major.	☐	☐	☐	☐	☐

What in the major has gotten in the way? Name a course, a missing skill, a schedule problem, or anything else that made it harder to learn what you wanted, to find the right course, or to build on work from an earlier course. Write one or two sentences. If nothing has gotten in the way, write None.

5. Learning outcomes and assignments

Courses in IMD have learning outcomes written in the syllabus. Sometimes it is easy to see which assignment addresses which outcome. Other times that connection is much harder to follow. Name a course that did this particularly well, a course that did it poorly, or one of each. Leave a block blank if you only need one example.

Example 1. Choose one.

☐ Particularly well ☐ Particularly poorly

Course number and title

Outcome. Write the learning outcome as you understood it from the syllabus. If you could not tell what it was, write Could not tell.

Assignment for that outcome, or Could not tell

Sentence. One sentence on what made the connection clear, or what made it hard to see.

Example 2. Choose one.

☐ Particularly well ☐ Particularly poorly

Course number and title

Outcome. Write the learning outcome as you understood it from the syllabus. If you could not tell what it was, write Could not tell.

Assignment for that outcome, or Could not tell

Sentence. One sentence on what made the connection clear, or what made it hard to see.

6. Continuity

How often has a later IMD course used skills or work you learned in an earlier IMD course? Choose one. If you have taken only one IMD course, choose Never.

☐ Very often ☐ Often ☐ Sometimes ☐ Rarely ☐ Never

When you wanted to continue a project from an earlier course into a later one, what happened? Choose one.

☐ A later course asked me to bring it, and the new work had to go further ☐ I could bring it if I asked

☐ I was asked to start a new project ☐ I have not asked

Studio and Capstone order. Write the order in which you took IMDM290 Collaborative Studio I, IMDM390 Collaborative Studio II, IMDM490 Capstone I, and IMDM491 Capstone II. Put courses from the same semester together. Example: 290, then 490, then 390 and 491 in the same semester. If you have not taken any of these, write Not yet.

Did a later one of those four courses use what you learned in an earlier one? Choose one. Yes: it used earlier work and still asked for something new. Partly: some carried and some started over. No: you started over. Not yet: you have not taken two of them.

☐ Yes ☐ Partly ☐ No ☐ Not yet

What carried forward, or where you had to start over. Write one or two sentences. Name the courses. Say what you were able to reuse, or what you had to learn again or begin from scratch. If this has not come up, write None.
